SUBJECT INDEX

Abduction muscle activation, rotator tendinosis and, abstract, **28**(5):355–356
Acetabular contact pressure, during gait, **28**(1):51–59
Achilles tendon rupture, functional bracing for, abstract, **28**(4):263
Activities of daily living
  chronic disease effects on, abstract, **28**(4):266
  elderly dementia patients vs. caregivers' reports of, abstract, **28**(2):122–123
  elderly vs. very elderly people, abstract, **28**(2):123
  shoulder motion and, abstract, **28**(2):123
Aging, chronic low back pain and, abstract, **28**(3):183
Allograft reconstruction, anterior cruciate ligament, knee joint accessory motion after, **28**(1):32–39
Amputee, below-knee, double-limb support and step-length asymmetry in, abstract, **28**(6):417
Anatomy
  cervical spine, book review, **28**(4):270–271, **28**(6):424–425
  clinical surface, book review, **28**(6):421
  of subtalar joint, letters to the editor, **28**(6):415
  of visual system, book review, **28**(1):67
Ankle
  fracture, epidemiology of, abstract, **28**(4):264
  lateral ligament rupture, high-frequency sonography and MRI comparison, abstract, **28**(5):357
Antagonists, elbow, effects on extension strength and endurance, abstract, **28**(5):355
Anterior cruciate ligament
  deficiency, performance-based vs. patient-reported function measures, **28**(6):392–399
  injury, proprioception after, abstract, **28**(2):123–124
  reconstruction
    allograft, knee joint accessory motion after, **28**(1):32–39
    functional capacity tests and, **28**(1):23–31
    patellar tendon mechanoreceptors used in, abstract, **28**(1):63
  transection, physiological/mechanical adaptations of medial collateral ligament after, abstract, **28**(1):64
Anthropometric measurements, short-arc quadriceps exercise predictions and, **28**(2):97–104
Aquatic therapy, book review, **28**(2):127
Arthritis
  degenerative, of knee joint, current concepts in arthroplasty, **28**(4):252–261
  hip and knee, management of, book review, **28**(5):362
Arthroplasty
  hip, outcomes of, book review, **28**(4):269–270
  knee, current concepts of, **28**(4):252–261
Arthroscopy, rotator cuff tear, effectiveness of, abstract, **28**(2):120
Articular cartilage
  composition and dynamics of, **28**(4):203–215
  healing of, **28**(4):232–240
  immobilization effects on, **28**(4):232–240
  injury and healing potential, **28**(4):192–202
  knee, rehabilitation after surgery for lesions of, **28**(4):232–240
  knee defects, autologous chondrocyte implantation treatment effects, **28**(4):241–251
  lesions, pathomechanics and classification of, **28**(4):216–231
  mechanisms of break-down of, **28**(4):216–231
  viscoelastic properties of, **28**(4):203–215
Assessment, functional, measures of, book review, **28**(6):421–422
Athletes
  body composition comparison between black and white male collegiate athletes, abstract, **28**(6):419
  elite, resistance training and, **28**(2):110–119
  movement skill assessment, book review, **28**(2):126
  patellofemoral pain, nonoperative treatment of, **28**(5):336–344
  rehabilitation of, book review, **28**(2):125
  training and overtraining, abstract, **28**(6):419

Back
  functional anatomy of, book review, **28**(2):126
  pain
    nonsurgical treatment for, book review, **28**(4):267
    posture and, during pregnancy, **28**(3):133–138
Back pain, low
  chronic, age/gender relation to, abstract, **28**(3):183
  dynamic strength exercise home training program effects, abstract, **28**(6):417
  fiber characteristics of lumbar paraspinal muscles and, abstract, **28**(1):63
  functional characteristic of trunk relation to, abstract, **28**(6):416
  intensive programs for, comparison study, abstract, **28**(3):181
  lumbar-hip flexion motion and, abstract, **28**(3):181–182
  management of, book review, **28**(5):361–362
  motion characteristics, clinical findings and clinical tests relation to, **28**(6):370–377
  nonsurgical treatment for, book review, **28**(4):267
  rehabilitation, motor skill acquisition strategies for, **28**(3):165–167
  static balance and weight distribution in, **28**(6):378–383
  work-related
    epidemiologic study design factors, abstract, **28**(3):184
    personal variables influence on, future research implications, abstract, **28**(1):62
Balance, static, weight distribution and, in low back pain, **28**(6):378–383
Ballet, lesser trochanter bony avulsion, chronic hip pain due to, **28**(3):168–173
Baseball, injuries in, book review, **28**(3):187
Biochemistry, healing tendon
  laser therapy and electrical stimulation effects on, abstract, **28**(6):418
  rigid plaster and function casting effects on, abstract, **28**(6):418
Biofeedback, patellofemoral pain management, **28**(5):336–344
Biomechanics
  of articular cartilage, **28**(4):203–215
  elastic resistance exercises for knee rehabilitation, **28**(1):40–50
  healing tendon
    laser therapy and electrical stimulation effects on, abstract, **28**(6):418
    rigid plaster and function casting effects on, abstract, **28**(6):418
  hip, during gait, **28**(1):51–59
  medial collateral ligament of elbow and, abstract, **28**(1):63
  musculoskeletal system, book review, **28**(2):126–127
  of patellofemoral disorders, **28**(5):286–298
  of patellofemoral joint, **28**(5):307–322
  physiological/mechanical adaptations of medial collateral ligament after anterior cruciate ligament transection, abstract, **28**(1):64
  of pitching, book review, **28**(3):187
  running shoe construction with varying midsole hardness, abstract, **28**(2):120–121
  scapulohumeral rhythm kinematics during resistive shoulder elevation and, **28**(2):74–80
  step-to gait, forefoot pressure and, **28**(3):139–145
  windmill softball pitching, injury mechanisms at elbow and shoulder, **28**(6):405–414
Body composition, comparison between black and white male collegiate athletes, abstract, **28**(6):419
Body mechanics, hip stress during lifting, abstract, **28**(3):182
Body movements, relaxation techniques and, video review, **28**(3):188–189
Bone, giant cell tumor of, prognostic relevance of C-myc gene expression in, abstract, **28**(6):418
Bone disorders, pathology of, radiographic correlation and, book review, **28**(6):423–424

Brace
  functional
    Achilles tendon rupture and, abstract, **28**(4):263
    for anterior cruciate ligament deficiency during treadmill running, abstract, **28**(6):419
    after anterior cruciate ligament allograft reconstruction, **28**(1):32–39
  idiopathic scoliosis, treatment efficacy, abstract, **28**(4):264
  patellofemoral joint disorder rehabilitation and, **28**(5):345–354
  patellofemoral pain management, **28**(5):336–344
Breast cancer, physical activity and, abstract, **28**(2):122

Cardiopulmonary rehabilitation, theory and applications of, book review, **28**(2):128
Carpal tunnel syndrome
  occupational exposure questionnaire, abstract, **28**(2):121–122
  release, self-administered outcome instrument, abstract, **28**(5):357
  self-administered outcome instrument, abstract, **28**(5):357
Cast, plaster and functional, effects, tendon healing, abstract, **28**(6):418
Cerebrovascular disease, physical activity and, abstract, **28**(2):122
Cervical spine
  pain, anatomy and management of, book review, **28**(4):270–271, **28**(6):424–425
  research in, book review, **28**(1):66–67
Cervico-thoracic motion segment, mobility of, neck-shoulder pain and, abstract, **28**(3):181
Chondrocyte implantation, autologous, articular cartilage defects of knee and, **28**(4):241–251
Chondromalacia patellae, quadriceps angle and, **28**(2):105–109
Chronic fatigue syndrome, current concepts in, book review, **28**(1):65
C-myc gene, in giant cell tumor of bone, prognostic relevance of, abstract, **28**(6):418
Cognitive distraction, knee position error in closed/open kinetic chain tasks and, **28**(2):81–87
Cold modalities, laboratory manual, book review, **28**(3):187
Collagen, articular cartilage and, **28**(4):203–215
Colon cancer, physical activity and, abstract, **28**(2):122
Coronary heart disease, physical activity and, abstract, **28**(2):122

Dementia, activities of daily living, elderly subjects and caregivers' reports of, abstract, **28**(2):122–123
Diabetes mellitus, physical activity and, abstract, **28**(2):122
Disability
  chronic, psychosocial adaptation to, book review, **28**(5):359
  management of in industry, principles/practices of, book review, **28**(5):361
Discharge outcome, 6- or 7-day inpatient physical therapy effects on, **28**(1):15–22
Disease, chronic, effects on physical function, abstract, **28**(4):266
Disease prevention, nutrition and, book review, **28**(5):363
Drug therapy, reference book for, book review, **28**(1):67
Dynamometer, hand-held, short-arc quadriceps exercise predictions and, **28**(2):97–104

Editorials
  Auf wiedersehen, **28**(6):367–369
  Challenging tradition in the treatment of patellofemoral disorders, **28**(5):275–276
  The conservative radical, **28**(3):131–132
  Hypothesis-based research, **28**(2):71–73
  The smooth ride, **28**(4):191
  What should you expect from the study of clinical outcomes?, **28**(1):1–2
Elastic resistance exercise, for knee rehabilitation, **28**(1):40–50
Elbow
  extension strength and endurance, antagonists and, abstract, **28**(5):355
  injury mechanisms, windmill softball pitching and, **28**(6):405–414
  medial collateral ligament, biomechanical evaluation of, abstract, **28**(1):63
Elderly
  activities of daily living, self-report vs. caregivers' reports, abstract, **28**(2):122–123
  biomechanical gait alterations, speed and, abstract, **28**(5):355
  function loss detection, nursing assistants' reliability in, abstract, **28**(4):265
  functional ability measurements and, abstract, **28**(4):266
  Tai Chi Chuan training, effects on fitness, abstract, **28**(6):420
  vs. very elderly, activities of daily living reports, abstract, **28**(2):123
Electrical stimulation
  healing tendon and, abstract, **28**(6):418
  laboratory manual for, book review, **28**(3):187
Electrical surface stimulation, idiopathic scoliosis, treatment efficacy, abstract, **28**(4):264
Electromyography
  hip, during gait, **28**(1):51–59
  push-up progressions effects on scapular stabilizers, **28**(3):146–157
  surface
    chronic musculoskeletal pain and, book review, **28**(5):363
    clinical use of, book review, **28**(2):125
Electromyostimulation, incomplete muscle activation after, abstract, **28**(5):356
Endurance training, skeletal muscle perfusion and, abstract, **28**(4):265
Energy metabolism, during neuromuscular electrical stimulation, abstract, **28**(3):181
Epidemiology
  of ankle fracture, abstract, **28**(4):264
  low back injury/pain in workplace, study design factors, abstract, **28**(3):184
Ergonomics
  apprentice carpenters, abstract, **28**(2):122
  in health care and rehabilitation, book review, **28**(4):269
Evaluation, patellofemoral joint, **28**(5):277–285
Exercise
  disease and, book review, **28**(5):363
  duration, sports food bar effects on, abstract, **28**(5):356–357
  eccentric
    muscle swelling and stiffness after, **28**(4):265–266
    normal forces and myofibrillar disruption after, abstract, **28**(4):262–263
  elastic resistance, for knee rehabilitation, **28**(1):40–50
  intensity of, Ratings of Perceived Exertion and, abstract, **28**(1):64
  motor skill acquisition strategies, low back pain rehabilitation and, **28**(3):165–167
  nutrition and, book review, **28**(5):359, **28**(5):363, **28**(6):424
  patellofemoral joint disorder rehabilitation and, **28**(5):345–354
  push-up progressions, scapular stabilizers and, **28**(3):146–157
  resistance training, elite athletes and, **28**(2):110–119
  stretch-shortening cycle, neuromuscular fatigue after, abstract, **28**(2):120
  water temperature and thermoregulation during, abstract, **28**(5):356
Exertion, perceived, ratings, outdoor running intensity determination and, abstract, **28**(1):64
Extensor mechanism, patellofemoral joint, **28**(5):277–285
Extracellular matrix degradation, articular cartilage lesions and, **28**(4):216–231
Extremities, mobilization, manual therapy techniques for, book review, **28**(1):65–66

Facet joints, thoracic and lumbar, mechanoreceptor ends in, abstract, **28**(3):182–183
Falls, construction workers, severity of, abstract, **28**(5):357
Fat utilization, food bar effects on, abstract, **28**(5):356–357
Fatigue, neuromuscular, after stretch-shortening cycle exercise, abstract, **28**(2):120
Femur, *in vivo* measurement of tensile axial strain, abstract, **28**(6):418

Fiber type, lumbar paraspinal muscles, in low back pain, abstract, **28**(1):63
Fibromyalgia
  current concepts in, book review, **28**(1):65
  muscle strength, working capacity, and effort in, abstract, **28**(3):183
Fine motor skills, lower extremity preference during, **28**(6):400–404
Fitness
  elderly, Tai Chi Chuan training, effects on, abstract, **28**(6):420
  physical activity and, in youth, abstract, **28**(6):419–420
Foot, plantar pressure and, step-to gait effects on, **28**(3):139–145
Footwear, knee joint kinetics during golf swing and, abstract, **28**(2):121
Force output, during neuromuscular electrical stimulation, abstract, **28**(3):181
Forefoot pressure, step-to gait and, **28**(3):139–145
Function loss, in elderly, nursing assistants' observation reliability, abstract, **28**(4):265
Functional ability, in gerontological research, abstract, **28**(4):266
Functional bracing
  Achilles tendon rupture and, abstract, **28**(4):263
  after anterior cruciate ligament allograft reconstruction, **28**(1):32–39
Functional disability, anterior cruciate ligament, performance-based vs. patient-reported measures of, **28**(6):392–399
Functional movement, stroke rehabilitation and, book review, **28**(1):68
Functional outcome, work-related disorders of upper extremity and, outcomes measure development, abstract, **28**(2):123
Functional testing, after anterior cruciate ligament reconstruction, **28**(1):23–31

Gait
  alterations in, speed and, in elderly, abstract, **28**(5):355
  clinical analysis of, book review, **28**(4):268
  hip biomechanics during, **28**(1):51–59
  limb-length discrepancy effects on, abstract, **28**(1):62
  step-length asymmetry in below-knee amputees, abstract, **28**(6):417
  step-to, forefoot pressure and, **28**(3):139–145
Gender disparity
  chronic low back pain, abstract, **28**(3):183
  hip internal/external rotation and, **28**(3):158–164
Gerontological research, functional ability measurements and, abstract, **28**(4):266
Giant cell tumor of bone, C-myc gene expression in, prognostic relevance of, abstract, **28**(6):418
Glycogen storage, running effects on, abstract, **28**(5):356
Golf, knee joint kinetics during swing, skill level and footwear influence on, abstract, **28**(2):121
Grip strength, submaximal effort detection, abstract, **28**(6):417
Gross motor skills, lower extremity preference during, **28**(6):400–404
Ground reaction forces
  Achilles tendon rupture and, abstract, **28**(4):263
  hip, during gait, **28**(1):51–59

Hand surgery, atlas of, book review, **28**(6):425
Headache
  tension-type, migraine severity continuum and, abstract, **28**(2):120
  time of onset, relation to psychophysical precedents of migraine, abstract, **28**(1):62
Health care, ergonomics in, book review, **28**(4):269
Hearing limitations, self-reported vs. performance-based, factors affecting contrast, abstract, **28**(1):64
Hearing loss, migraine and, abstract, **28**(5):358
Heat application, sympathetic skin responses to, abstract, **28**(5):355
Hip
  arthritis, management of, book review, **28**(5):362
  arthroplasty
    6- or 7-day inpatient physical therapy, correlation with length of stay/outcome, **28**(1):15–22
    outcomes of, book review, **28**(4):269–270
  biomechanics of, during gait, **28**(1):51–59
  congenital dislocation of, operative treatment results classification system, abstract, **28**(4):263–264
  flexion, low back pain and, abstract, **28**(3):181–182
  internal/external rotation, position and gender influence on, **28**(3):158–164
  pain, due to lesser trochanter bony avulsion, in ballet dancer, **28**(3):168–173
  stress during lifting, abstract, **28**(3):182
Hop tests, after anterior cruciate ligament reconstruction, **28**(1):23–31
Hypertension, physical activity and, abstract, **28**(2):122

Illness, chronic, psychosocial adaptation to, book review, **28**(5):359
Immobilization, articular cartilage damage and, **28**(4):203–215
Impingement
  shoulder, joint mobilization as treatment for, **28**(1):3–14
  subacromial, nonoperative treatment of, abstract, **28**(4):264–265
Inflammation, neurogenic, book review, **28**(4):271
Isometric preload, muscular performance and, abstract, **28**(4):262

Joint degeneration/deterioration
  articular cartilage injury and, **28**(4):192–202
  patellofemoral, vastus medialis relation to, **28**(6):384–391
Joint disorders, pathology of, radiographic correlation and, book review, **28**(6):423–424
Joint mobilization, primary shoulder impingement syndrome treatment, **28**(1):3–14
Joint motion, hip internal/external rotation and, gender and position effects on, **28**(3):158–164
Joint prosthesis, evaluation of, book review, **28**(4):271
Jump test, one-legged vertical, after anterior cruciate ligament reconstruction, **28**(1):23–31

Kinematics
  hip, during gait, **28**(1):51–59
  scapulohumeral rhythm, during resistive shoulder elevation, scapulothoracic muscle fatigue and, **28**(2):74–80
Kinetic chain tasks, open vs. closed, functional distinctions between, **28**(2):81–87
Kinetics, knee joint, during golf swing, skill level and footwear influence on, abstract, **28**(2):121
Knee
  anterior cruciate ligament deficiency
    functional brace during treadmill running, abstract, **28**(6):419
    performance-based vs. patient-reported measures of, **28**(6):392–399
  arthritis, management of, book review, **28**(5):362
  arthroplasty
    6- or 7-day inpatient physical therapy, correlation with length of stay/outcome, **28**(1):15–22
    current concepts of, **28**(4):252–261
  articular cartilage defects of, autologous chondrocyte implantation effects, **28**(4):241–251
  articular cartilage injury, **28**(4):192–202
  articular cartilage lesions, rehabilitation after surgery for lesions of, **28**(4):232–240
  degenerative arthritis, current concepts in arthroplasty and, **28**(4):252–261
  disorders of, quadriceps angle and, **28**(2):105–109
  extensor dysfunction, quadriceps angle and, **28**(2):105–109
  injury
    elastic resistance exercise quantification and, **28**(1):40–50
    osteoarthritis and, outcome measure score validity, **28**(2):88–96
  joint accessory motion, after anterior cruciate ligament allograft reconstruction, **28**(1):32–39
  joint kinetics, during golf swing, skill level and footwear influence on, abstract, **28**(2):121

ligament injury, proprioception after, abstract, **28**(2):123–124
pain, physical and arthroscopic examination techniques of patellofemoral joint, **28**(5):277–285
patellar malalignment evaluation, **28**(5):286–298
patellofemoral disorders
classification system and guidelines for nonoperative treatment, **28**(5):307–322
clinical classification of, **28**(5):299–306
patellofemoral joint, anatomy of, **28**(5):286–298
patellofemoral stress syndrome, **28**(5):336–344
position error in closed/open kinetic chain tasks, cognitive distraction effects on, **28**(2):81–87
problems of, book review, **28**(6):425
rehabilitation, elastic resistance exercises for, **28**(1):40–50
valgus-varus motion during walking and stair climbing, abstract, **28**(3):185
Knee Injury and Osteoarthritis Outcome Score, validity of, **28**(2):88–96

Laboratory studies, physical agents, book review, **28**(3):187
Laser therapy, healing tendon and, abstract, **28**(6):418
Legal research, book review, **28**(1):68
Lesser trochanter, bony avulsion, chronic hip pain in ballet dancer due to, **28**(3):168–173
Limb-length discrepancy, effects on gait, abstract, **28**(1):62
Limbs, functional anatomy of, book review, **28**(2):126
Longevity, physical activity/fitness and, abstract, **28**(2):122
Lower extremity
functional anatomy of, book review, **28**(2):126
musculoskeletal disorders of, in union carpenters, abstract, **28**(3):184
preference, during gross and fine motor skills, **28**(6):400–404
stresses during gait, step-to gait effects on, **28**(3):139–145
Lumbar spine
facet joint, mechanoreceptor endings in, abstract, **28**(3):182–183
flexion, low back pain and, abstract, **28**(3):181–182
mobilization of, forces applied by therapists during, abstract, **28**(4):262
motion, low back pain and, **28**(6):370–377
Lumbar-hip flexion motion, low back pain and, abstract, **28**(3):181–182

Magnetic resonance imaging, ankle ligament rupture detection and, abstract, **28**(5):357
Managed care, dictionary of terminology in, book review, **28**(6):421
Manipulation techniques, chronic neck pain and, abstract, **28**(6):416
Manual therapy, techniques in, book review, **28**(1):65–66
Mechanoreceptors
patellar tendon, ACL reconstruction and, rabbits, abstract, **28**(1):63
in thoracic and lumbar facet joints, abstract, **28**(3):182–183
Medial collateral ligament
biomechanical evaluation of, abstract, **28**(1):63
physiological/mechanical adaptations of, after anterior cruciate ligament transection, abstract, **28**(1):64
Median test, tibial translation after anterior cruciate ligament allograft reconstruction and, **28**(1):32–39
Medical devices, evaluation of, book review, **28**(4):271
Medications, over-the-counter, book review, **28**(1):67
Migraine
neurotology of, abstract, **28**(5):358
psychophysical precedents of, relation to onset time of headache, abstract, **28**(1):62
severity continuum, tension-type headache and, abstract, **28**(2):120
Mobilization
joint, primary shoulder impingement syndrome treatment, **28**(1):3–14
manual therapy techniques for, book review, **28**(1):65–66
spinal, mobilization of, forces applied by therapists during, abstract, **28**(4):262
Mood states, psychophysical precedents of migraine and, abstract, **28**(1):62
Motion analysis, motion characteristics in low back pain and, **28**(6):370–377
Motion sickness, migraine and, abstract, **28**(5):358
Motor activities, lower extremity preference during, **28**(6):400–404
Motor functioning, self-reported vs. performance-based, factors affecting contrast, abstract, **28**(1):64
Motor skill, acquisition strategies, low back pain rehabilitation and, **28**(3):165–167
Motor unit firing rates, counting in human muscle, abstract, **28**(2):121
Movement, functional, stroke rehabilitation and, book review, **28**(1):68
Movement skill, assessment of, book review, **28**(2):126
Muscle
activation levels, elastic resistance exercises and, for knee rehabilitation, **28**(1):40–50
motor unit firing rates, counting of, abstract, **28**(2):121
Muscle activation, incomplete, after electromyostimulation training, abstract, **28**(5):356
Muscle afferents
capsaicin-sensitive, muscle fibers induced by deafferentation of, abstract, **28**(2):124
neck, vestibulosympathetic reflex and, abstract, **28**(4):263
Muscle contraction
bilateral, neuromuscular drive and force during, abstract, **28**(4):262
concentric work output and, abstract, **28**(4):262
electromyostimulation-evoked eccentric, muscle activation after, abstract, **28**(5):356
Muscle fatigue
scapulothoracic, scapulohumeral rhythm kinematics during resistive shoulder elevation and, **28**(2):74–80
shoulder joint position sense and, abstract, **28**(3):184–185
Muscle function, surface electromyography and, book review, **28**(2):125
Muscle perfusion, endurance training effects on control of, abstract, **28**(4):265
Muscle regeneration, satellite cell proliferation during, nonsteroidal anti-inflammatory effects on, abstract, **28**(2):121
Muscle strength
fibromyalgia and, abstract, **28**(3):183
short-arc quadriceps exercise predictions from dynamometer and anthropometric measurements and, **28**(2):97–104
testing, after anterior cruciate ligament reconstruction, **28**(1):23–31
Muscle swelling, stiffness and, after eccentric exercise, abstract, **28**(4):265–266
Muscle sympathetic activity, vestibulosympathetic reflex and, abstract, **28**(4):263
Musculoskeletal care, essentials of, book review, **28**(5):362
Musculoskeletal disorders
musicians and, risk factors for, abstract, **28**(3):184
occupational physical activity and risk of, abstract, **28**(5):358
surface electromyography and, book review, **28**(2):125
work-related risk factors, in aluminum smelter, abstract, **28**(5):358
Musculoskeletal pain
nonspecific, rehabilitation outcome, abstract, **28**(3):183
surface electromyography and, book review, **28**(5):363
Musculoskeletal system, overuse injuries of, book review, **28**(6):425–426
Musicians, musculoskeletal disorder risk factor, abstract, **28**(3):184
Myofibrillar disruption, after eccentric exercise, abstract, **28**(4):262–263

Neck
chronic pain, training, physiotherapy, and manipulation for, abstract, **28**(6):416
flexion, vestibulosympathetic reflex and, abstract, **28**(4):263
pain
cervico-thoracic motion segment mobility and, abstract, **28**(3):181
nonsurgical treatment for, book review, **28**(4):267
sprain injury, acute treatment of, abstract, **28**(3):182

Needle muscle biopsy, neuromuscular disorder evaluation and, abstract, **28**(5):357
Neurogenic inflammation, book review, **28**(4):271
Neuromuscular control, during bilateral muscle contraction, abstract, **28**(4):262
Neuromuscular disorders
  needle muscle biopsy evaluation of, abstract, **28**(5):357
  surface electromyography and, book review, **28**(2):125
Neuromuscular electrical stimulation, force output and energy metabolism during, abstract, **28**(3):181
Neuromuscular fatigue, after stretch-shortening cycle exercise, abstract, **28**(2):120
Neuropathy, suprascapular, nonoperative treatment effects, abstract, **28**(1):62
Neurotology, of migraine, abstract, **28**(5):358
New products, **28**(2):129, **28**(4):272, **28**(5):364, **28**(6):427
Nonsteroidal anti-inflammatory, effects, satellite cell proliferation during muscle regeneration, abstract, **28**(2):121
Nutrition
  in exercise and sports, book review, **28**(5):359, **28**(5):363
  sports and, book review, **28**(3):186–187
  in sports and exercise, book review, **28**(6):424
  sports food bar, fat utilization and exercise duration effects, abstract, **28**(5):356–357

Obesity, articular cartilage damage and, **28**(4):203–215
Occupational risk factors, carpal tunnel syndrome, questionnaire, abstract, **28**(2):121–122
Ophthalmology, visual system anatomy, book review, **28**(1):67
Optometry, visual system anatomy, book review, **28**(1):67
Orthopaedics
  pediatric, book review, **28**(3):186
  sciences basic to, book review, **28**(2):126–127
Orthotics, patellofemoral pain management, **28**(5):336–344
Osteoarthritis, articular cartilage disorders and, **28**(4):203–215
Osteoporosis, physical activity and, abstract, **28**(2):122
Outcome measures
  knee injury, **28**(2):88–96
  Severin classification system of outcome of operative treatment for congenital dislocation of hip, abstract, **28**(4):263–264
Outcome measures/studies
  6- or 7-day inpatient physical therapy effects on, knee/hip arthroplasty, **28**(1):15–22
  in rehabilitation, book review, **28**(6):421–422
  work-related upper extremity disorders, abstract, **28**(2):123
Outcomes research, sourcebook for, book review, **28**(6):422

Pain management, patellofemoral joint pain, **28**(5):336–344
Paraspinal muscles, fiber type of, low back pain and, abstract, **28**(1):63
Patellar compression syndromes, **28**(5):307–322
Patellar tendon
  malalignment of, evaluation, **28**(5):286–298
  mechanoreceptors of, anterior cruciate ligament reconstruction and, rabbits, abstract, **28**(1):63
  quadriceps angle and, **28**(2):105–109
Patellar tracking, patellofemoral joint disorder rehabilitation and, **28**(5):345–354
Patellofemoral joint
  anatomy of, **28**(5):286–298
  biomechanics of, **28**(5):286–298
  deterioration, vastus medialis relationship to, **28**(6):384–391
  disorders
    classification system and guidelines for nonoperative rehabilitation, **28**(5):307–322
    rehabilitation of, **28**(5):345–354
    treatment trends in, editorial, **28**(5):275–276
  dysfunction, clinical classification of, **28**(5):299–306
  malalignment of, **28**(5):277–285
  pain
    cervical spine, book review, **28**(6):424–425
    clinical classification of, **28**(5):299–306
    nonoperative treatment for, **28**(5):336–344
    rehabilitation and surgical intervention for, book review, **28**(6):423
  physical and arthroscopic examination techniques, **28**(5):277–285
  postoperative management of, **28**(5):323–335
  quadriceps angle and, **28**(2):105–109
Patellofemoral stress syndrome, **28**(5):336–344
Pathology, physical therapist and, book review, **28**(4):268
Pathomechanics, articular cartilage lesions, **28**(4):216–231
Pediatric orthopaedics, book review, **28**(3):186
Performance tests, chronic disease effects on, abstract, **28**(4):266
Peripheral nerve compression syndromes, overview of, book review, **28**(6):425
Pharmacotherapy, reference book for, book review, **28**(1):67
Phonophobia, migraine and, abstract, **28**(5):358
Physical activity
  biological basis of, abstract, **28**(6):420
  health-related fitness in youth and, abstract, **28**(6):419–420
  lifetime patterns of, questionnaire development/reliability, abstract, **28**(4):265
  longevity and, abstract, **28**(2):122
Physical agents, laboratory manual for, book review, **28**(3):187
Physical effort, fibromyalgia and, abstract, **28**(3):183
Physical examination, patellofemoral joint, **28**(5):277–285
Physical function, chronic disease effects on, abstract, **28**(4):266
Physical limitations, self-reported vs. performance-based, factors affecting contrast, abstract, **28**(1):64
Physical therapist
  cervical spine research, book review, **28**(1):66–67
  forces applied during spinal mobilization, abstract, **28**(4):262
  pathology and, book review, **28**(4):268
  research, practical guide for, book review, **28**(3):186
  work practice, book review, **28**(3):188
Physical therapy
  6- or 7-day inpatient treatment, correlation with length of stay/outcome, hip/knee arthroplasty, **28**(1):15–22
  aquatic, book review, **28**(2):127
  articular cartilage lesions, **28**(4):216–231
  clinical specialization in, **28**(3):174–180
  continuing education courses, letter to the editor, **28**(1):60–61
  hip pain due to lesser trochanter bony avulsion, in ballet dancer, **28**(3):168–173
  history and future of, **28**(3):174–180
  laboratory manual for physical agents, book review, **28**(3):187
  movement skill assessment, book review, **28**(2):126
  online research, letter to the editor, **28**(1):60–61
  orthopaedic, history and future of, **28**(3):174–180
  patellar malalignment and, **28**(5):286–298
  patellofemoral disorders and, **28**(5):286–298
  professional, fractioning of, letter to the editor, **28**(1):60–61
  quality research and, letter to the editor, **28**(1):60–61
  research-oriented therapeutic approaches, letter to the editor, **28**(1):60–61
  subspecialties in, letter to the editor, **28**(1):60–61
  suprascapular neuropathy, treatment effects, abstract, **28**(1):62
Physiotherapy, chronic neck pain and, abstract, **28**(6):416
Pitching, windmill softball, injury mechanisms at elbow and shoulder, **28**(6):405–414
Pittsburgh Sleep Quality Index, nursing home residents and, abstract, **28**(2):122
Plantar pressure, step-to gait effects on, **28**(3):139–145

Posture, back pain and, during pregnancy, **28**(3):133–138
Pregnancy, posture and back pain during, **28**(3):133–138
Primary care
  low back pain management, book review, **28**(5):361–362
  sports medicine for, book review, **28**(3):188
Proprioception
  after knee ligament injury, abstract, **28**(2):123–124
  knee position error in closed/open kinetic chain tasks during cognitive distraction and, **28**(2):81–87
  shoulder, muscle fatigue and, abstract, **28**(3):184–185
Prosthesis, evaluation of, book review, **28**(4):271
Proteoglycan, articular cartilage and, **28**(4):203–215
Psychophysical factors, migraine and, relation to onset time of headache, abstract, **28**(1):62
Psychophysiological disorders, surface electromyography and, book review, **28**(2):125
Psychosocial adaptation, to chronic illness/disability, book review, **28**(5):359
Pulmonary dysfunction, cardiopulmonary rehabilitation, theory and applications of, book review, **28**(2):128
Push-up progression, scapular stabilizer effects, **28**(3):146–157

Q angle, literature review, **28**(2):105–109
Quadriceps angle, literature review, **28**(2):105–109
Quadriceps muscle
  short-arc exercise, prediction from dynamometer and anthropometric measurements, **28**(2):97–104
  strength test, after anterior cruciate ligament reconstruction, **28**(1):23–31

Radiography
  bone and joint disorders pathology and, book review, **28**(6):423–424
  rheumatoid arthritis and, abstract, **28**(1):63–64
Ratings of Perceived Exertion, exercise intensity and, abstract, **28**(1):64
Rehabilitation
  aquatic, book review, **28**(2):127
  articular cartilage injury, **28**(4):192–202
  articular cartilage lesions, **28**(4):216–231, **28**(4):232–240
  cardiopulmonary, theory and applications of, book review, **28**(2):128
  chronic neck pain, abstract, **28**(6):416
  ergonomics in, book review, **28**(4):269
  evaluation of current models of, book review, **28**(1):67–68
  functional assessment and outcomes measures in, book review, **28**(6):421–422
  idiopathic scoliosis, treatment efficacy, abstract, **28**(4):264
  injured athlete, book review, **28**(2):125
  knee, elastic resistance exercises for, **28**(1):40–50
  laboratory manual for physical agents, book review, **28**(3):187
  low back pain
    management of, book review, **28**(5):361–362
    motor skill acquisition strategies, **28**(3):165–167
    paraspinal muscle fiber type and, abstract, **28**(1):63
  manual therapy, book review, **28**(1):65–66
  nonspecific musculoskeletal pain, outcome, abstract, **28**(3):183
  operative treatment for congenital dislocation of hip and, abstract, **28**(4):263–264
  patellofemoral joint
    classification system and guidelines, **28**(5):307–322
    clinical classification of disorders of, **28**(5):299–306
    deterioration, vastus medialis relation to, **28**(6):384–391
    pain, **28**(5):336–344
    postoperative management of, **28**(5):323–335
  patellofemoral joint disorders, **28**(5):345–354
  science and engineering, role of, book review, **28**(1):67–68
  in sports medicine, book review, **28**(5):359–360
  stroke, functional movement and, book review, **28**(1):68
  subacromial impingement syndrome, nonoperative treatment of, abstract, **28**(4):264–265
  upper extremity, push-up progression effects on scapular stabilizers, **28**(3):146–157
  whiplash neck sprain injury, acute treatment of, abstract, **28**(3):182
  work practice, book review, **28**(3):188
Relaxation techniques, video review, **28**(3):188–189
Repetitive loading, articular cartilage damage and, **28**(4):203–215
Repetitive strain injury, current concepts in, book review, **28**(1):65
Research
  gerontological, functional ability measurements and, abstract, **28**(4):266
  hypothesis-based, editorial, **28**(2):71–73
  legal, book review, **28**(1):68
  practical guide to, book review, **28**(3):186
Resistance training, elite athletes and, **28**(2):110–119
Retinacular release, lateral, patellofemoral joint surgery and, **28**(5):323–335
Rheumatoid arthritis, radiograph assessment, abstract, **28**(1):63–64
Rotator cuff tear
  arthroscopic repair effectiveness, abstract, **28**(2):120
  nonoperative treatment of, abstract, **28**(4):264–265
Rotator tendinosis, isometric abduction muscle activation in, abstract, **28**(5):355–356
Running
  outdoor, intensity of, perceived exertion ratings and, abstract, **28**(1):64
  shoe constructions with varying midsole hardness, perceptual/biomechanical variables for, abstract, **28**(2):120–121
  treadmill, functional brace for anterior cruciate ligament deficiency during, abstract, **28**(6):419

Scapular stabilizers, push-up progression, electromyographical analysis during, **28**(3):146–157
Scapulohumeral rhythm kinematics, during resistive shoulder elevation, scapulothoracic muscle fatigue and, **28**(2):74–80
Scapulothoracic muscle, fatigue, scapulohumeral rhythm kinematics during resistive shoulder elevation and, **28**(2):74–80
Scientific method, hypothesis-based research and, editorial, **28**(2):71–73
Scoliosis, idiopathic, nonoperative treatment efficacy, abstract, **28**(4):264
Severin classification system, operative treatment for congenital dislocation of hip, reliability of, abstract, **28**(4):263–264
Shoe construction, running, perceptual/biomechanical variables for midsole hardness differences, abstract, **28**(2):120–121
Shoulder
  comprehensive text for, book review, **28**(5):360
  function, after arthroscopic repair of rotator cuff tear, abstract, **28**(2):120
  impingement syndrome, joint mobilization as treatment for, **28**(1):3–14
  injury, in baseball, book review, **28**(3):187
  injury mechanisms, windmill softball pitching and, **28**(6):405–414
  joint position, muscle fatigue and, abstract, **28**(3):184–185
  motion, activities of daily living and, abstract, **28**(2):123
  pain, cervico-thoracic motion segment mobility and, abstract, **28**(3):181
  range of motion exercise, suprascapular neuropathy and, treatment effects, abstract, **28**(1):62
  rotator tendinosis, isometric abduction muscle activation in, abstract, **28**(5):355–356
  scapulohumeral rhythm, factors affecting, **28**(2):74–80
  subacromial impingement syndrome, nonoperative treatment of, abstract, **28**(4):264–265
  symptoms and function of, self-report questionnaire for, abstract, **28**(6):416–417
Skeletal muscle perfusion, training effects on control of, abstract, **28**(4):265
Skin responses, sympathetic, heat application and, abstract, **28**(5):355
Sleep, disturbed, in nursing home residents, abstract, **28**(2):122
Sonography, high-frequency, ankle ligament rupture detection and, abstract, **28**(5):357
Spinal motion, low back pain and, **28**(6):370–377

Spine
cervical pain, clinical anatomy, book review, **28**(6):424–425
mobilization, manual therapy techniques for, book review, **28**(1):65–66
trauma, evaluation and treatment of, book review, **28**(6):422–423
Sports
articular cartilage damage and, **28**(4):203–215
endurance training, skeletal muscle perfusion and, abstract, **28**(4):265
nutrition and, book review, **28**(3):186–187, **28**(5):359, **28**(5):363, **28**(6):424
softball pitching, injury mechanisms at shoulder and elbow, **28**(6):405–414
training and overtraining, abstract, **28**(6):419
Sports injury
baseball, book review, **28**(3):187
management of, reference guide for, book review, **28**(6):422
Sports medicine
current review of, book review, **28**(5):360–361
primary care and, book review, **28**(3):188
rehabilitation in, book review, **28**(5):359–360
Sprint training, skeletal muscle perfusion and, abstract, **28**(4):265
Stair climbing, knee valgus-varus motion during, abstract, **28**(3):185
Static balance, weight distribution and, in low back pain, **28**(6):378–383
Step-length asymmetry, in below-knee amputees, abstract, **28**(6):417
Strength training, dynamic, home program for low back pain management, abstract, **28**(6):417
Stressors, migraine and, relation to onset time of headache, abstract, **28**(1):62
Stroke, movement skill assessment, book review, **28**(2):126
Subacromial impingement syndrome, nonoperative treatment of, abstract, **28**(4):264–265
Subtalar joint, anatomy, letters to the editor, **28**(6):415
Suprascapular neuropathy, nonoperative treatment effects, abstract, **28**(1):62
Surface electromyography, clinical use of, book review, **28**(2):125
Surgery
articular cartilage lesions of knee, rehabilitation after, **28**(4):232–240
carpal tunnel syndrome, self-administered outcome instrument, abstract, **28**(5):357
hand, atlas of, book review, **28**(6):425
patellofemoral joint, postoperative management of, **28**(5):323–335

Tai Chi Chuan, fitness of the elderly and, abstract, **28**(6):420
Taping, patellofemoral joint disorder rehabilitation and, **28**(5):345–354
Tendon
anatomy, physiology, pathology of, book review, **28**(2):127–128
healing
laser therapy and electrical stimulation effects on, abstract, **28**(6):418
rigid plaster and function casts effects on, abstract, **28**(6):418
Tensile axial strain, in femur, *in vivo* measurement of, abstract, **28**(6):418
Tension, easing of, video review, **28**(3):188–189
Therapeutic heat, laboratory manual, book review, **28**(3):187
Therapy, aquatic, book review, **28**(2):127
Thermoregulation, water temperature and, during moderate-intensity exercise, abstract, **28**(5):356
Thoracic spine, facet joint, mechanoreceptor endings in, abstract, **28**(3):182–183
Tibial translation, after anterior cruciate ligament allograft reconstruction, **28**(1):32–39
Tibiofibular syndesmosis, high-frequency sonography and MRI comparison, abstract, **28**(5):357
Trace elements, sports and, book review, **28**(3):186–187
Training
chronic neck pain and, abstract, **28**(6):416
overtraining and, in sports, abstract, **28**(6):419
Trunk, functional characteristics of, relation to low back pain, abstract, **28**(6):416
Tunnel syndromes, overview of, book review, **28**(6):425

Upper extremity
functional anatomy of, book review, **28**(2):126
musculoskeletal disorders of
in newspaper employees, abstract, **28**(3):183–184
in union carpenters, abstract, **28**(3):184
rehabilitation, push-up progressions effects on scapular stabilizers, **28**(3):146–157
work-related disorders of, functional outcomes measure, abstract, **28**(2):123

Vastus medialis
patellofemoral joint disorder rehabilitation and, **28**(5):345–354
relation to patellofemoral joint deterioration, **28**(6):384–391
Vertigo, migraine and, abstract, **28**(5):358
Vestibulosympathetic reflex, neck afferents and muscle sympathetic activity and, abstract, **28**(4):263
Visual analog scales, psychophysical precedents of migraine relation to onset time of headache, abstract, **28**(1):62
Visual limitations, self-reported vs. performance-based, factors affecting contrast, abstract, **28**(1):64
Visual system, clinical anatomy of, book review, **28**(1):67
Vitamins, sports and, book review, **28**(3):186–187

Walking, knee valgus-varus motion during, abstract, **28**(3):185
Weight distribution, static balance and, in low back pain, **28**(6):378–383
Weight training, elite athletes and, **28**(2):110–119
Whiplash, acute treatment of, abstract, **28**(3):182
Workers' Compensation
low back disorders and, personal variables influence on, abstract, **28**(1):62
musculoskeletal disorders in union carpenters, abstract, **28**(3):184
Working capacity, fibromyalgia and, abstract, **28**(3):183
Workplace
carpal tunnel syndrome exposure questionnaire, abstract, **28**(2):121–122
disability management in industry, principles/practices of, book review, **28**(5):361
ergonomics, apprentice carpenters, abstract, **28**(2):122
injury
construction worker fall severity, abstract, **28**(5):357
surveillance systems and, abstract, **28**(5):357–358
low back disorders related to, personal variables influence on, future research implications, abstract, **28**(1):62
low back injury/pain, epidemiologic study design factors, abstract, **28**(3):184
musculoskeletal disorders
risks for, in aluminum smelter, abstract, **28**(5):358
in union carpenters, abstract, **28**(3):184
physical activity, musculoskeletal symptom risks and, abstract, **28**(5):358
upper extremity disorders and, outcomes measure development, abstract, **28**(2):123
upper extremity musculoskeletal disorders, newspaper employees, abstract, **28**(3):183–184
